I'm just practicing...Rande...i think this will work well though.

Thanks for setting it up!

Question...

I was messing around with the forum layout and now it won't switch back. I went into the Forum Tools and tried to select Flat View, but it won't let me click it. Any thoughts?

It says you are set to Flat. Sometimes the old settings stick in the browser's cache when you are changing back and forth.
